Terre Haute South Vigo High School Wins Energy Department's Greater-Cincinnati Regional Science Bowl Competition

Cincinnati- The Terre Haute (Ind) South Vigo High School science team won the Greater-Cincinnati Regional Science Bowl that was held February 21, at Cincinnati State Technical and Community College. Ten high schools from Ohio, Kentucky and Indiana were tested during the competition on their knowledge of astronomy, biology, chemistry, earth science, mathematics, and physics.

The Terre Haute South Vigo High School team will advance to the 20th Annual Department of Energy (DOE) National Science Bowl, April 29 to May 4, in Washington, D.C. DOE launched the National Science Bowl in 1991 to help further student interest in science with more than 13,000 students participating.

The Regional Science Bowl is sponsored by the Cincinnati-based DOE Environmental Management Consolidated Business Center that provides contracting and administrative support for DOE's Office of Environmental Management projects. This was the 19th year for the regional competition to be held.

The 2010 Greater-Cincinnati Regional Science Bowl was originally scheduled for February 6, but had to be rescheduled twice due to snow conditions in the area. Due to the rescheduled dates, only 10 of an original 19 registered schools were able to participate in the competition on February 21.

Other high school science teams that placed and competed in the final rounds were:

- Sycamore High School, Cincinnati, second place
- DuPont Manual High School, Louisville KY, third place
- Centerville High School, Centerville OH, fourth place
